## PROJECTS

### LeadMATCH

Heavy-duty data enrichment tool that reconstructs contact data from as little as 3 data points  
LeadMatch is our most powerful data enhancing tool that offers forensic reconstruction of bad contact data to increase sales leads and revenue. It is one of the few data enrichment tools in the world that fills in all missing fields of an incomplete contact record. And, it does so within a few seconds' to a few hours' time. It also the only tool out there that is able to turn a personal email into a corporate contact. Most of our clients have seen a 5 to 7

### LeadCARE

Automatically keeps contact data clean and up to date with a guaranteed +90% average data accuracy  
LeadCARE is a powerful CRM tool that does all the work of making sure your b2b contacts in your database are clean and up to date, automatically and continuously.

"Let us create a better business environment by championing software excellence."

LeadCARE doesn't just give you an overall view of the health of your contact data – it goes further. It actually repairs your database for you by automatically getting rid of duplicate records and cleansing bad, erroneous and incomplete contact records. It also validates the deliverability of emails, phone connections and the accuracy of sources. The system is on 24 hours a day, 7 days a week, 365 days a year so you can be sure your contact records will always be up to date. And, it's the only system in the marketing data field that guarantees your contact data will be 90% accurate on average, all the time.

#### **Salex Tax Office - RADAR**

Sales Tax Office computes and applies sales taxes for use in interstate, inter provincial, or inter jurisdictional environments.

Sales Tax Office has the following modules:

Administration Module: Sets company-wide standards. You can create Organizations and divisions, define roles and responsibilities, add and assign users, oversee security, view and unlock locked areas, and perform other administrative tasks.

Calculation Module: Performs the day-to-day work of transaction processing. You can create and map stock keeping units, set up custom groups and items, customize exemption classes and exemptions, create overrides, and perform other daily tasks.
